

CONSTANT VISCOSITY SYNTHETIC

WHAT IS CVS?

Constant Viscosity Synthetic is our proprietary technology. CVS allows our lubricants to be fully usable in the drastic temperature changes experienced in our northern climates.

PROPERTIES

- Stable viscosity
- Strong EP characteristics
- Protects equipment
- Does not attract contamination

USES

- Saw & Guide lubricant
- Chain & Gear lubricant
- Anti-Stick for conveyor chutes

BENEFITS

Fiscal savings of 40%. We've managed keep the pricing of CVS competitive.

Using our CVS based lubricant will save you money.

EGL 1221 reduces guide lube consumption by 65 - 75%

HISTORY

CVS was developed by engineering the lubricant from a whole new perspective. Conventional synthetic lubricants for Saw & Guide cannot compete with CVS.

We literally started from the ground up developing our Constant Viscosity Synthetic framework. This framework allows us to make impressive lubricants for specific applications, and they are extremely economical for the end user.
