

CVS Air System Lubricant

CVS Air System Lube has been developed with performance and user friendliness in mind.

#1 Safe for workers, when it becomes airborne from the air system.

#2 Will prevent sluggish valves and cylinders.

#3 Will not mix with or be washed away by water.

With a pour point well below -50C CVS Air System Lube works just as well in the winter as it does in the summer. It keeps your air lines and valves well lubricated. Inside and outside of your facility.

Available in 20L pails, 205L Drums and 1000L totes
